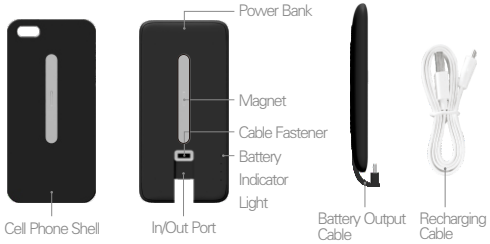
Lepow™

Pie

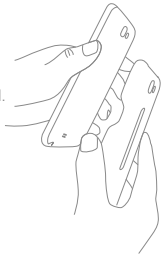
Lepow X Combined
Type Power Bank

Thanks for your support to LEPOW!
Please read the guide for Maintenance carefully in order to protect your legal interests.

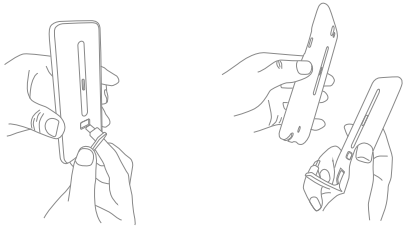
■ Product Diagram



▸ Fix the phone into the shell.

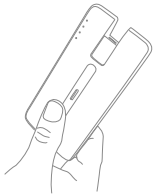


▸ Remove the fixing slot port of the power Output Cable, and move the power bank close to the phone shell. The magnet will be absorbed to the proper position; connect the cell phone to recharge it.



▸ Unplug the output cable to recharge the power bank via the recharging cable.

▸ Shake it slightly and the battery indicator light will be lit to indicate the remaining battery level.



Tips: As magnet is provided only on one side of the power bank, be sure to align it to the proper side. Please recharge your power bank regularly (at least once every six months) to make its service life longer.

You can also have "PIE"magnetic suite

■ Clause of warranty

Warranty period for the product is one year since the date of sales. Within this time period, customer may receive the maintenance service at the sales spot by presenting the buying record. In case beyond the warranty time, customer may acquire the paid maintenance service at sales spot by presenting the buying record.

The maintenance service is unavailable for the situations as below:

- Product not produced by our company;
- Product not distributed by our company;

(Our company shall not be responsible for any legal obligations on body injury or damage of property due to consumer's misuse by breach towards the above warning.)

Table of Hazardous Substances

Products Name	The Name and Purity of harmful substance or element in the product					
	Pb	Hg	Cd	Cr(Vi)	PBB	PBDE
PIE	X	O	O	O	O	O

O means the content of such hazardous substance among all homogeneous materials in this part is under the limit rated by the standard of S/T1363–2006.

X means the content of such hazardous substance in some kind of homogeneous material in this part is beyond the limit rated by the standard of S/T1363–2006, but still fits the clause of exemption in RoHs.

Product parameter

Sku# : 851792&851785
Cell type: Li–Polymer
Capacity: 3000mAh
Dimensions: 124 mm *60 mm *13mm
Operating temp: 5℃~45℃
Output voltage: DC5V
Output Current (Max) : 800mA

Input voltage: DC5V
Input Current (Max) : 1000mA
Input voltage (Standard): 5.0 V
Input voltage (Threshold): 5.0V ± 0.25V
Standard: GB4706.18–2005

The package contains User Manual, LEPOW mobile power bank PIE, Battery Output Cable(fixed on top ends of the power bank)、Recharging Cable、Felt package、Qualified certificate.Please contact the distributor immediately in case of any part missing or broken.
